

# CornCTF

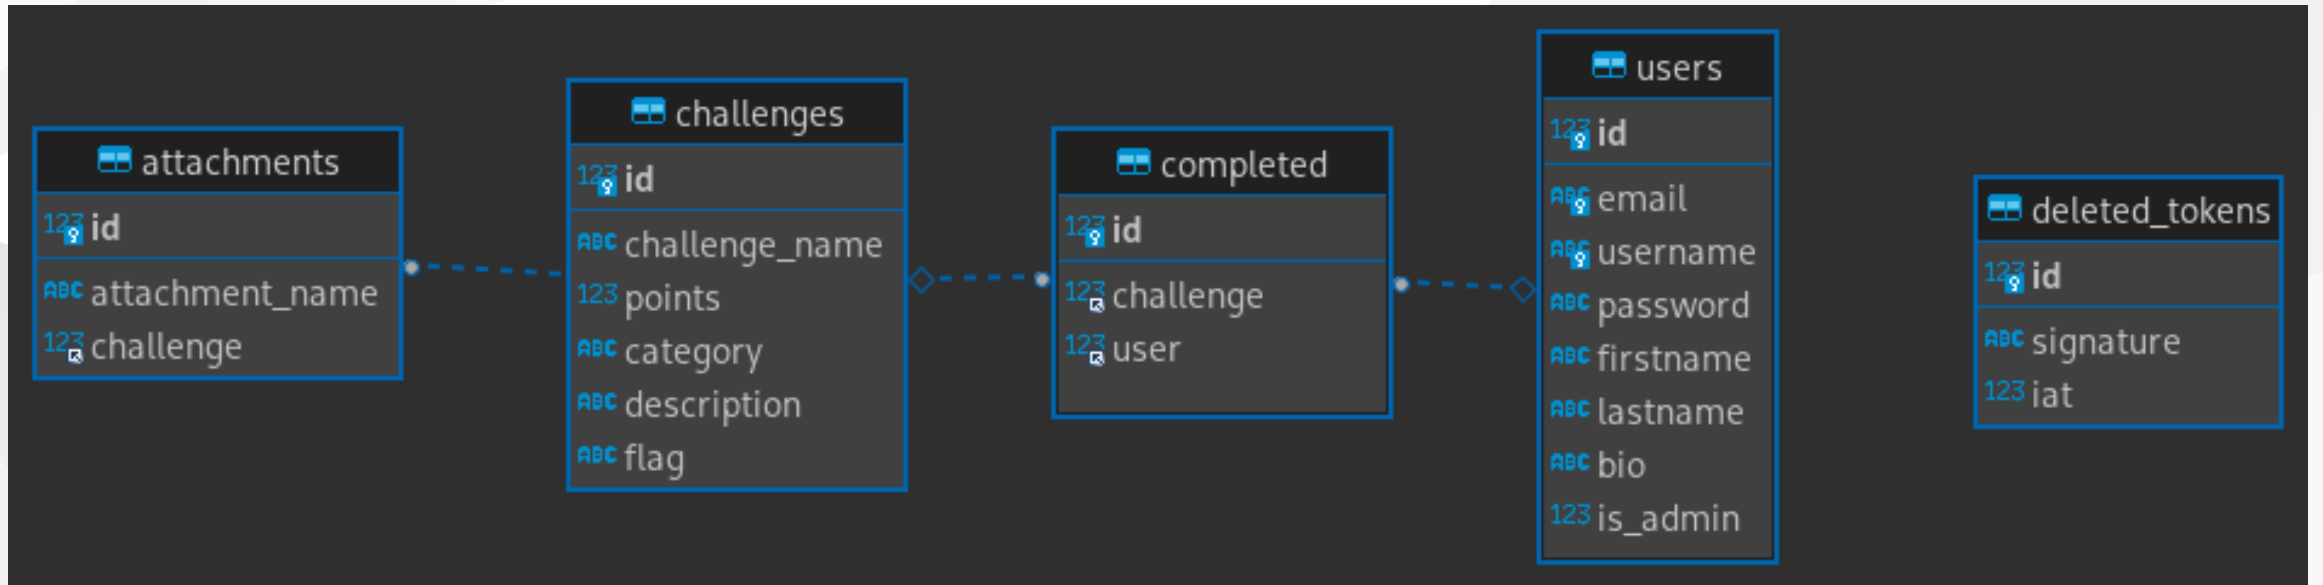

Riccardo Isola  
Ludovico Capiaghi

# Dominio applicativo

Sul nostro sito proponiamo una game-experience nel formato capture-the-flag con Challenge sulla cybersecurity in cui lo scopo è trovare la flag sfruttando le vulnerabilità dei servizi forniti

Il sito è responsive by design, rispettando le [linee guida di google](#), utilizzando la libreria [BeerCSS](#)

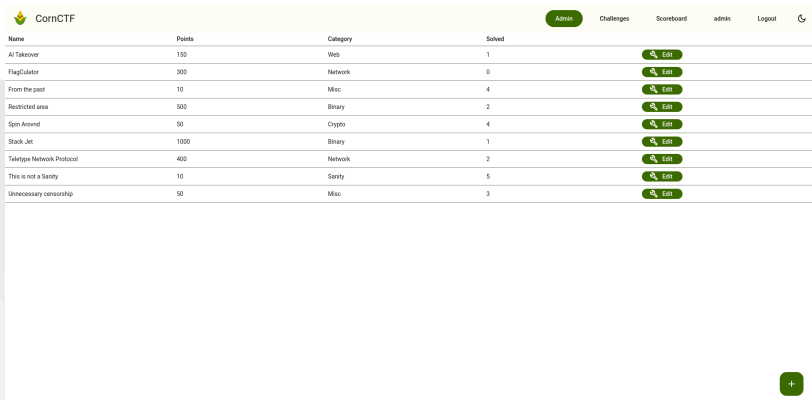

# Il nostro DB

Per implementare il *remember me* usiamo JWT

# Funzionalità aggiuntive

- Area amministrativa
- Challenge

The screenshot shows the 'Admin' page of the CornCTF interface. It features a table with columns for Name, Points, Category, and Solved. The table lists various challenges such as 'All Takeover', 'FlagCulator', 'From the past', 'Restricted area', 'Spin Around', 'Stack Jet', 'Teletype Network Protocol', 'This is not a Seshy', and 'Unnecessary censorship'. Each row has an 'Edit' button next to it.

Name	Points	Category	Solved
All Takeover	150	Web	1
FlagCulator	300	Network	0
From the past	10	Misc	4
Restricted area	500	Binary	2
Spin Around	50	Crypto	4
Stack Jet	1000	Binary	1
Teletype Network Protocol	400	Network	2
This is not a Seshy	10	Seshy	5
Unnecessary censorship	50	Misc	3
